

PARESHKUMAR KRISHNA TAK

Email: takparesh@gmail.com

Contact: +91 9762384301

Date of Birth: 6th April 1992

Objective

Seeking a Data Engineer position to utilize my skills and abilities in Information Technology that offers professional growth while being resourceful, innovative, and flexible.

Professional Abridgement

Currently working with **Synechron Technologies.**, as a **Technology Lead (Hadoop Big Data)** with total experience of **11 Years**. During my career, I got chance to work on below technologies,

- Big Data
 - Good experience on ETL data processing using **Hadoop, Sqoop, hive, Spark and Shell Scripting.**
 - Designing job architecture, Development, and deployment.
 - Working experience on Cloud services like Azure Data Factory, Azure Databricks, Azure Data Lake
 - Experience on applications – **Control M, Azkaban, Ranger, Ambari, NIA, Service Now, JIRA**
- Data ETL
 - Worked on SSIS, Azure SQL Data Warehouse, HD Insight, Power BI
 - Used Azure APIs for creating Azure HDInsight cluster.
 - .Net application to work with Azure API
- Web Application
 - Worked with .Net MVC, Visual Studio, SQL Server.
 - Worked with Microsoft Silverlight

Professional History

Current Company - Synechron Technologies Pvt. Ltd. | Team Lead - Technology, Big Data | Aug 2022 – Present

Project: Citi Digital Client Report

Duration: Aug 2022 - till date

Role: Tech Lead

Client – Banking Industry (Citi)

Description: Consolidated core Reference/Master Entities (Products, Accounts, Parties, Employees, Segments) from multiple MCs into a centralized system aligned with Olympus Data Strategy. Enabled Olympus as the authorized redistributor of unified reference data for Citi Market Data applications.

Responsibilities:

- Architected and engineered high-performance Extract, Transform, Load (ETL) pipelines using Apache Spark YAML.
- Generate file based, email based reports for deliveries.
- Populate parquet tables for representation team (tableau)
- Spearheaded an automated Spark monitoring suite, improving data reliability and reducing manual intervention for load-count verification.
- Optimized distributed Spark applications through strategic partitioning and caching, resulting in a 30% reduction in processing latency.
- Directed the end-to-end CI/CD lifecycle using Jenkins and UCDeploy, ensuring zero-downtime release cycles.

Skills: Hive, Spark, Big Data, Impala, Oracle, GitHub, Jenkins, UCD, Autosys, Jira

Previous Company

Name : Infosys Ltd. (2017- 2022)

Designation : Technology Lead

Project Description:

A – Data Ingestion & Processing Platform

Developed and maintained a data ingestion and processing platform that collected data from multiple vendors in various file formats into Azure Data Lake Storage (ADLS). The solution ingested raw data into Hadoop HDFS, processed large-scale datasets using Hadoop clusters based on client and data science requirements, and delivered curated data to the Gold layer in ADLS. Additionally, the platform generated data extracts in ADLS to support downstream analytics and business use cases.

B – Azure Cloud Migration

Contributed to the migration of approximately 100 existing data pipelines from the legacy on-premises platform to Microsoft Azure. The project involved refactoring and validating ETL workflows to ensure data integrity, functional parity, and seamless execution on the Azure cloud platform while supporting testing, deployment, and migration activities.

Responsibilities:

- Collaborated with clients to gather and analyze business and technical requirements, translating them into actionable implementation plans.
- Prepared project implementation strategies, effort estimations, and timelines, and obtained client approval before execution.
- Worked closely with the development team to design, develop, and implement data models and ETL pipelines in accordance with project requirements.
- Represented production changes during Change Advisory Board (CAB) meetings, presenting deployment plans and securing approvals for production releases.
- managed production deployments and configured workflows in Control-M to ensure reliable scheduling, monitoring, and execution of data pipelines

Previous Company

Name : Boston Byte Pvt. Ltd. (Sep-2015 to Dec-2017)

Designation : Software Developer

Responsibility :

- Manage Azure Portal and Services
- Development of Application (SSIS, C#.Net)
- Gather Requirements from Client
- Implementation, Testing, and deployment.

Project Description:

A: **Product Catalog Feed** - Generate Product Catalog Feed (as per required structure of each client Google/Facebook/Trade Doubler/etc.) by each locale from raw XML files with updated data. Used SSIS to process the data and generate the feed files. And to upload the output files to respective Client FTP.

B: **Campaign Report** -Import the data into HDInsight/ Azure Data Warehouse from Azure Blob. Process the data as per required format using HIVE queries (Manage the HDInsight/ Azure SQL Data warehouse cluster using Azure API). Export the summarized data to Azure SQL Database. Use the data in Power BI to show the reports.

C: **Service Status Dashboard** - Implemented the API for Project execution events (Start, Stop, Error, Send Email). Call the respective API from each Project while daily execution. Using the information gathered by API Show the daily execution status of all projects on Dashboard.

Previous Company

Name : Palash Healthcare Systems Pvt. Ltd. (June-2014 – Aug-2015)

Designation : Software Developer

Responsibility :

- Development & Unit Testing
- Providing technical support to the client for Production issues.

Project Description:

A: Payroll + Time and Attendance (Web Based)- It was a Payroll application which had functionality for salary calculation based on attendance sheet. It had Tax calculation functionality aligned with Indonesian Gov. Policy.

B: WEB IPD (web Based) - WEB IPD is the Hospital management application. It had functionality to manage small as well as large hospitals including OPD, IPD, Radiology, Pathology, EMR, Nursing Station, Inventory, Billing, and Patient Console. Etc.

Academic Background:

Completed Bachelor of Engineering (2013) from Pune University.

I hereby declare that above mentioned details are correct and complete to the best of my knowledge.

Date:

Place: Pune
